GENERAL NOTES				
Metal structure treatment	Iron structures should be painted to prevent rust and improve equipment life.			
	- Remove loose rust with a wire brush, sandpaper or chemical rust remover.			
	- If applicable, sand areas where paint is chipping until surface is smooth.			
	- Remove dust or oil with a degreaser or denatured alcohol.			
	- Prime surface to protect against rust and corrosion			
Foundations fixing	- The ground must be stable and have a low water table.			
	- The structure must be fixed on firm oncrete soil or on poured footings with steel reinforcement.			
	- The anchorage can be bolted with expansive ramplugs or welded.			
Wood treatment	- The wood must be treated with pesticides and kiln-dried to ensure adequate humidity.			
	- Wood sealer should be applied for later use.
