GENERAL NOTES	
Wood treatment	<ul style="list-style-type: none"> <li>- The wood must be treated with pesticides and kiln-dried to ensure adequate humidity.</li> <li>- Wood sealer should be applied for later use.</li> <li>- Apply wood preservative on all surfaces.</li> <li>- Painting the outside of the bottom with bitumastic paint is the best and cheapest way.</li> <li>- All joints should be treated with an asphalt-based or bitumastic compound during the construction. It may be necessary to caulk eventual bad leaks with caulking compound afterwards.</li> </ul>
